Overview

The HealthPartners and Regions Hospital Cancer Care Centers provide comprehensive cancer care at nine locations in Minnesota and western Wisconsin in order to provide expert care close to home. Our multidisciplinary team consists of medical and radiation oncologists, Board certified Oncology Pharmacists, Oncology Nursing Society-certified oncology nurses, social workers, genetic counselors, a nutritionist, and palliative care specialist. University of Minnesota orthopedic oncologists see patients and perform surgeries at Regions Hospital. Our program is certified by both the American College of Surgeons' Commission on Cancer and the American Society of Clinical Oncology. We have a robust clinical trials program including early phase clinical trials of new and investigational therapies. As a training site for University of Minnesota Hematology Oncology Fellowship Program, we host a number of weekly educational events as we work to train the next generation of practicing cancer specialists. We offer a "48 hour promise" program that allows patients to be seen within two days of a new diagnosis of cancer. We have been partnering with Rein in Sarcoma since its inception in 2001.
